ISHA KAPOOR

FRONTEND DEVELOPER | REACT & DESIGN SYSTEMS

Bengaluru, India • isha.kapoor@example.com • +91-00000-00003 • github.com/sample-isha-kapoor

ABOUT

Frontend developer with a product-minded approach to accessible, responsive interfaces. Builds component-driven applications with React and TypeScript, collaborates closely with design, and uses performance profiling and automated tests to improve the user experience.

TOOLBOX

React, TypeScript, JavaScript (ES2022)
Next.js, Vite, HTML5, CSS, Tailwind CSS
Design systems, responsive UI, accessibility
Playwright, Vitest, Lighthouse, Git

EXPERIENCE

Frontend Developer Intern | PixelHarbor Studio (fictional) *Feb 2025 - Jul 2025*

- Delivered 14 reusable React components with typed props and documented states for loading, empty, and error scenarios.
- Improved a demo catalogue page's Lighthouse performance score from 68 to 91 by optimizing images and reducing unnecessary renders.
- Partnered with a designer to fix keyboard navigation, focus states, and contrast issues across six key screens.

Web UI Volunteer | Open Campus Initiative *Aug 2024 - Jan 2025*

- Built responsive event and FAQ pages from wireframes, checking layouts at mobile, tablet, and desktop breakpoints.
- Added form-level validation and clear success/error feedback, then tested keyboard-only navigation before release.

PROJECTS

FlowBoard - Team Planning UI *React, TypeScript, Tailwind CSS*
Created a responsive kanban board with drag-and-drop tasks, filtering, and persistent demo data.

Recipe Finder *Next.js, REST API, CSS Modules*
Implemented debounced search, loading skeletons, and accessible recipe cards with mobile-first layouts.

Component Playground *Storybook, Vitest*
Documented button, modal, input, and toast variants; added interaction tests for core states.

Accessibility Audit Notes *Lighthouse, axe DevTools*
Reviewed common form and navigation patterns and logged actionable fixes for semantics, labels, and keyboard focus.

ADDITIONAL HIGHLIGHTS

- Uses semantic HTML and reusable components to keep interfaces maintainable.
- Prioritizes small-screen behavior, clear empty states, and accessible keyboard interactions.
- Relevant coursework: Web Engineering, Human-Computer Interaction, Software Testing.

EDUCATION & CERTIFICATES

B.Tech. Information Technology | Lakeside Technical University | 2022 - 2026 | CGPA: 8.1/10
Responsive Web Design (course certificate) | Web Accessibility Basics
